Index to Subjects—Volume 23, 1991

Current Microbiology

© Springer-Verlag New York Inc. 1991

Acinetobacter calcoaceticus strains, physicochemical and structural studies of, 337
Adenine methylation, role in tryptophan biosynthetic pathway in *E. coli*, 21
Adenosine N-oxide reductase, role in anaerobic respiration in *torA*$^-$, *dms*$^-$ *E. coli* mutant, 105
α-amylase, secreted by *Lactobacillus amylovorus*, purification and characterization of, 207
Amino acids, released by proteolysis in *S. commune*, recycling and translocation of, 27
Ammonia, repression of nitrate reductase enzyme synthesis in *A. doliolum by*, 239
Anabaena doliolum, regulation of assimilatory nitrate reductase in, 239
Anaerobic digester, isolation of furfural-degrading sulfate-reducing bacterium from 327
Antifungal compound LY214352, *Aspergillus nidulans* mutants resistant to, 39
Archaebacteria, halophilic, map of genomic structure of, 299
Arthrobacter strains, competitive growth of under oligotrophic conditions, 159
Arthrospores, produced by HmB^R transformants of *Cochliobolus lunatus*, 303
Aspergillus nidulans mutants, isolation, characterization, and genetic analysis of, 39
ATCC 29682, effect of glutathione and thiol-reacting compounds on, 85
ATCC 824, mutant of *Clostridium acetobutylicum*, enzymatic characterization of, 253
ATP synthase β-subunit, mitochondrial targeting sequence of, 75
Autolysis, very high isobutyl alcohol production capability and, 281
Autolysogeny, relationship with high isobutyl alcohol production in *Saccharomyces cerevisiae*, 281

Bacillus sphaericus, construction of direct selection vectors for use in, 149
Bacillus sphaericus toxin, components of, effect on mosquito larvae and mosquito-derived tissue culture-grown cells, 51
Bacillus subtilis, bacilysin production and sporulation in, 61
Bacilysin production, sporulation in *Bacillus subtilis* and, 61
Bacteriochlorophyll levels, *trans* suppression of, induced by *R. sphaeroides* gene, 259
Bacteriophages, role in construction of vectors for genetic material transfer, 183
Bacteroides fragilis-type bacteria, growth on pancreatic trypsin and chymotrypsin, 143
Bacteroides ruminicola, cloning of xylanase genes from, 15
Bacteroides ruminicola ss *brevis*, isolation and characterization of lytic phages from, 183
Bacteroides species, ruminal and colonic, comparison of cloned genes from, 15
Bdellovibrio strains, relationships among, revealed by partial sequences of 16S ribosomal RNA, 115
β-galactosidase activity, effect of *dam* cells on, 21
β-lactam antibiotics, effect on characteristics of *Cardiobacterium hominis*, 197
Biodegradation, of herbicides by mixed bacterial cultures, 65
Bradyrhizobium japonicum, in *Vicia faba*, effect of wyerone on, 153

Calcium, intracellular, effect of heat-stable enterotoxin on, in rat enterocytes, 291
Candida albicans, FCST testing of ketoconazole susceptibility of, 45
Canola seed, stimulation of root growth by transformed and nontransformed *P. putida*, 111
Carbohydrate limitation, role in survival of rhizobia in soil and nodulation competition, 159
Carbon dioxide, effect of ruminal concentration on fermentative metabolism of *Eudiplodinium maggii*, 245
Carbon source, effect on secondary metabolism in *Streptomyces thermoviolaceus*, 227
Cardiobacterium hominis, antibiotic susceptibility, morphological variations, and plasmid and membrane analysis of, 197
Carotenoid levels, *trans* suppression of, induced by *R. sphaeroides* gene, 259
Catabolite repression, effect on production of colonization factor antigen II of enterotoxigenic *E. coli*, 71
Cellobiase secretion, from *Neocallimastix frontalis* EB188, 175
Cellulomonas sp. *M32Bo*, effect of conditions on protoplast formation in, 265
cfaA gene, glucose suppression of CFA/I system mediated through, 307
ChGul, *Methanosarcina* strain isolated from goat feces, 165
Chitobiase, from *Trichoderma harzianum*, purification and characterization of, 285
Chymotrypsin
  inhibition of extracellular proteases of *Clostridium perfringens* by, 215
  pancreatic, growth of proteolytic and nonproteolytic *Bacteroides fragilis*-type bacteria, 143
Clostridium acetobutylicum, enzymatic characterization of nonmotile, nonsolventogenic mutant of, 253
Clostridium perfringens type A, isolation and characterization of extracellular proteases of, 215
Cochliobolus lunatus, morphological changes and induced sporulation in HmB^R transformants of, 303
Collagen binding, by lactobacilli, 33
Colonization, competitive, of *P. fluorescens* and *P. putida* in sterile soil, 97
Colonization factor antigen (CFA/I) fimbriae, effect of glucose on *E. coli* synthesis of, 307
Colonization factor antigen II (CFA/II), of enterotoxigenic *E. coli*, production of, 71
Conidia, produced by HmB^R transformants of *Cochliobolus lunatus*, 303
Culex pipiens larvae, toxicity to *Bacillus sphaericus* toxin, 51
Culex quinquefasciatus, mosquito-derived tissue culture-grown cells of, effect of *B. sphaericus* toxin on, 51
Culture, role in growth behavior and protease production, 1
Cyclic AMP, relief of glucose repression of CFA/I production by, 307

dam mutation, effect on induction of *trp* promoters, 21
2,4-Dichlorophenoxyacetic acid, degradation by mixed bacterial cultures, 65
Dimethylsulfoxide, reduction by terminal reductase in *Proteus mirabilis*, 271
Dimethylsulfoxide reductase, role in S- and N-oxide reduction in *E. coli*, 105

Direct selection vector pBD214, role in construction of direct selection vector for *Bacillus sphaericus*, 149
DNA sequences, promoter-active, cloned from *Synechocystis* sp. PCC 6803 in *E. coli* host, 333
Dose–response effect, result of flow cytofluorometric susceptibility test on yeasts, 45

Egg yolk reactive enzyme activity, microassay for quantitative measurement of, 81
Enterobacter strains, competitive growth of under oligotrophic conditions, 159
Enterotoxin, heat-stable (STa), effect on intracellular calcium in rat enterocytes, 291
Enzyme-linked immunosorbent assays (ELISA), detection of antibodies to Shiga-like toxins and *E. coli* 0157:H7 lipopolysaccharide by, 189
Erythromycin, selection of chimeric vector of *B. sphaericus* with, 149
Escherichia coli
  catabolite repression of colonization factor antigen I operon of, 307
  cloning and expression of *rec*A-like gene from *Z. mobilis* in, 123
  differentiation of S- and N-oxide-reducing activities of, 105
  enterotoxigenic, production of colonization factor antigen II of, 71
  expression of xylanase activity in, 15
  role of adenine methylation in tryptophan biosynthetic pathway in, 21
Escherichia coli B, glutathione-deficient mutant of, 85
Escherichia coli heat-stable enterotoxin, increase in calcium in rat enterocytes induced by, 291
Escherichia coli 0157:H7 lipopolysaccharide, enzyme-linked immunosorbent assays for detection of antibodies to, 189
Escherichia coli plasmids, cloning of *Thiobacillus ferrooxidans* plasmids into, 321
Escherichia coli promoters, DNA sequences cloned from *Synechocystis* sp. PCC 6803 as, 333
Eudiplodinium maggii, effect of ruminal concentrations of O_2 and CO_2 on fermentation of, 245
Experimental compounds, in vivo method for screening effect of, 277

Fibronectin, effect on collagen binding by lactobacilli, 33
Flow cytofluorometric susceptibility test (FCST), ketoconazole susceptibility of yeasts tested by, 45

Gardnerella vaginalis, purification and characterization of hemolysin from, 7
GATC sites, Dam-mediated adenine methylation at, 21
Gene expression, of *rec*A-like gene in *E. coli*, 123
Glucose
  effect of production of colonization factor antigen of enterotoxigenic *E. coli*, 71
  effect on synthesis of colonization factor antigen of *E. coli*, 307
Glutamate, effect on growth rates of *Rhizobium leguminosarum* bv. *phaseoli strains*, 159
Glutathione-deficient mutant, of *E. coli*, effect of oxidants and thiol-reacting compounds on, 85
Glycerol, product of fermentation of rumen entodiniomorphid ciliate *Eudiplodinium maggii*, 245
Glycine betaine, effect on growth rate of *S. aureus* in high osmolarity medium, 131
Granaticin, production in different cultures of *Streptomyces thermoviolaceus*, 227
Growth media, effect on morphological variations of *Cardiobacterium hominis*, 197
Growth rate, effect on protease production, 1

H_2-CO_2, growth of *Methanosarcina* strain on, after adaptation, 165
Halococcus saccharolyticus, physical map of 257 kilobase-pairs region from, 299
Haptoglobin-hemoglobin, as iron source in strains of *Vibrio anguillarum*, 221
HeLa cell cytotoxicity neutralization assays, detection of antibodies to Shiga-like toxins in human serum by, 189
Heme compounds, as iron source for *Vibrio anguillarum*, 221
Hemoglobin, as iron source in strains of *Vibrio anguillarum*, 221
Hemolysin, from *Gardnerella vaginalis*, purification and characterization of, 7
Human erythrocytes, specificity for *Gardnerella vaginalis* hemolysin, 7
Human lymphocyte CEM T_4 cells, in vivo method for screening effect of experimental compounds on, 277
Human serum, antibodies to Shiga-like toxins and *E. coli* lipopolysaccharide in, 189
Hydroxyester wyerol, product of metabolism of wyerone by *R. leguminosarum* in faba beans, 153
Hygromycin B resistance, plasma-encoded, transformation of *Cochliobolus lunatus* by, 303

Iron-binding proteins, as iron source for *Vibrio anguillarum*, 221
Isobutyl alcohol production, relationship with autolysogeny in *Saccharomyces cerevisiae*, 281

Ketoconazole, FCST testing of susceptibility of yeasts to, 45

L-leucine transport, in opportunistic yeasts *Malassezia furfur* and *M. pachydermatis*, 315
Lactobacilli, collagen type I (Cn-I) binding by, 33
Lactobacillus amylovorus, purification and characterization of α-amylase secreted by, 207
Legionella pneumophila serogroup 1, plasmids from Spanish isolates of, 233
Leishmania mexicana, in vivo method for screening effect of experimental compounds on, 277
LY214352-resistant mutants, isolation, characterization, and genetic analysis of, 39
Lytic phages of, *Bacteroides ruminicola* ss *brevis*, isolation and characterization of, 183

Malassezia furfur, characterization of L-leucine transport in, 315
Malassezia pachydermatis, characterization of L-leucine transport in, 315
Mecoprop, degradation by mixed bacterial cultures, 65
Methanococcoides methylutens, as methanogenic isolate from oxic upper oceanic layer, 89
Methanogenesis, in oxic upper layer of ocean, 89
Methanogenic bacterium, from oxic upper ocean layer, enrichment and characterization of, 89
Methanosarcina strain, isolated from goat feces, 165
2-(2-Methyl-4-chlorophenoxy)propionic acid, degradation by mixed bacterial cultures, 65
MIC effect, result of flow cytofluorometric susceptibility tests on yeasts, 45
Microassay, quantitative measurement of egg yolk-reactive enzyme activity in *P. cepacia* by, 81
Microbial adhesion to hydrocarbons (MATH), properties of *Acinetobacter calcoaceticus* strains used in, 337
Microwill spectrophotometer, role in in vivo method for screening effect of experimental compounds on nonadhering cell lines, 277
Mitochondrial polypeptides, in *S. cerevisiae*, effect of mutant protein on transport of, 75

Mixed bacterial cultures, degradation of herbicides by, 65
Mosquito larvae, toxicity of *Bacillus sphaericus* toxin components to, 51
Motility, lower solvent yields in fermentation of *Clostridium acetobutylicum* mutant correlated with decrease in, 253

N-succinyl-L-phynylalanine-*p*-nitroanilide, hydrolyzed by extracellular proteases of *Clostridium perfringens*, 215
Nascent synthesis, of *Neocallimastix frontalis* EB188, 175
Neocallimastix frontalis EB188, nascent synthesis and cellobiase secretion from, 175
Nicotinamide N-oxide (NAMO), reduction by terminal reductase in *Proteus mirabilis*, 271
Nitrate, reduction by terminal reductase in *Proteus mirabilis*, 271
Nitrate reductase, regulation in *Anabaena doliolum*, 239
Nonhemolytic phospholipase C, produced by *Pseudomonas cepacia* Pc224C, 139

Oxidative metabolism, effect on secondary metabolism in *Streptomyces thermoviolaceus*, 227
Oxygen, effect of ruminal concentration on fermentative metabolism of *Eudiplodinium maggii*, 245

Pancreatic proteases, use by colonic bacteroides, 143
ϕBrb01 phage, from *B. ruminicola* ss *brevis*, isolation and characterization of, 183
ϕBrb02 phage, from *B. ruminicola* ss *brevis*, isolation and characterization of, 183
Photopigment suppression gene (*pps*), of *R. sphaeroides*, induces *trans* suppression of bacteriochlorophyll and carotenoid levels, 259
Physical map, of 257 kilobase-pairs region from genome of *Halococcus saccharolyticus*, 299
Phytoalexin, of faba beans, degradation of, 153
Plasmid pAN 7-1, morphological changes of *Cochliobolus lunatus* caused by, 303
Plasmid pGSS15, effect on root elongation enhancement property of *P. putida*, 111
Plasmids
  effect on antibiotic susceptibility of *Cardiobacterium hominis*, 197
  from *Thiobacillus ferrooxidans*, characterization and cloning of, 321
  of Spanish isolates of *Legionella pneumophila* serogroup 1, 233
Precursor proteins, in vivo transport in mitochondria of, 75
Proline, effect on growth rate of *S. aureus* in high osmolarity medium, 131
Protease production, regulated by growth rates, 1
Proteases, extracellular, of *Clostridium perfringens* type A, isolation and characterization of, 215
Proteinase K, effect on collagen binding by lactobacilli, 33
Proteobacteria, placement of *Bdellovibrio* genus in delta division of, 115
Proteolysis, in nitrogen-deprived *Schizophyllum commune* colonies; 27
Proteus mirabilis, reduction of N-oxides and sulfoxide by terminal reductase in, 271
Protoplasts, effect of different conditions on formation, regeneration, and fusion of, 265
Pseudomonas cepacia
  measurement of egg yolk-reactive enzyme activity in, 81
  nonhemolytic phospholipase C produced by, 139
Pseudomonas fluorescens, competitive colonization with *P. putida* in sterile soil, 97
Pseudomonas putida
  competitive colonization with *P. fluorescens* in sterile soil, 97
  stimulation of root growth in canola seed by inoculation of, 111

Radiotracer labeling, dependence of cellobiase secretion from *Neocallimastix frontalis* on nascent protein synthesis studied by, 175
RCI-1, glutathione-deficient mutant of *E. coli B*, 85
*rec*A-like gene, from *Zymomonas mobilis*, expression in *E. coli*, 123
Respiratory activity, of *Streptomyces thermoviolaceus* in cultures with different carbon sources, 227
Rhizobium leguminosarum, degradation of wyerone produced by *Vicia faba* by, 153
Rhizobium leguminosarum bv. *phaseoli* strains, competitive growth of under oligotrophic conditions, 159
Rhodobacter capsulatus, *trans* suppression of bacteriochlorophyll and carotenoid levels by *R. sphaeroides* gene, 259
Rhodobacter sphaeroides, *trans* suppression of bacteriochlorophyll and carotenoid levels by gene from, 259
Rhodotorula rubra, ketoconazole susceptibility of, 45
Ribosomal RNA sequences, role in revealing relationships among *Bdellovibrio* strains, 115
Rumen bacteria, genetic manipulation of, 183

Saccharomyces cerevisiae
  autolysogeny and high isobutyl alcohol production in, 281
  mutant precursor protein in, 75
Salt, effect on role of *Methanosarcina* in rumen, 165
Scanning electron microscopy, plant–microbial interaction studied by, 111
Schizophyllum commune, proteolysis and amino acid recycling during nitrogen deprivation in, 27
Shiga-like toxins I and II, enzyme-linked immunosorbent assays for detection of antibodies to, 189
Siderophores, role in iron uptake in *Vibrio anguillarum*, 221
Solvent production, decreased yield in fermentation of *Clostridium acetobutylicum* mutant, 253
Sonication, solubilization of nitrate reductase enzyme from *Anabaena doliolum* by, 239
Sporulation, induced, in HmB^R transformants of *Cochliobolus lunatus*, 303
Staphylococcus aureus, proline and glycine betaine as principal compatible solutes for, 131
Streptomyces thermoviolaceus, effect of carbon source and oxidative metabolism on secondary metabolism in, 227
Sulfate-reducing bacterium, furfural-degrading, isolated from anaerobic digester, 327
Sulfide, effect on role of *Methanosarcina* in rumen, 165
Synechocystis sp. PCC 6803, cloning of promoter-active DNA sequences from, 333

Thermus sp. isolate, growth behavior and protease production by, 1
Thiobacillus ferrooxidans, characterization and cloning of plasmids from, 321
Thymidylate synthetase gene, direct selection of recombinants by insertional inactivation of, 149
Torulopsis glabrata, ketoconazole susceptibility of, 45
Transferrin, as iron source in strains of *Vibrio anguillarum*, 221
Trichoderma harzianum, purification and characterization of extracellular chitobiase from, 285
Trimethoprim, selection of insertional inactivation of β22 *thy* gene by resistance to, 149

Trimethylamine N-oxide (TMAO), reduction by terminal reductase in *Proteus mirabilis*, 271
Trimethylamine N-oxide reductase, role in S- and N-oxide reduction in *E. coli*, 105
trp promoter, growth phase-dependent induction of, 21
Trypsin, pancreatic, growth of proteolytic and nonproteolytic *Bacteroides fragilis*-type bacteria, 143
Tween 80, L-leucine transport in *Malassezia* spp. incubated with, 315

Vibrio anguillarum, iron-binding proteins and heme compounds as iron sources for, 221
Vicia faba, degradation of the phytoalexin wyerone produced by, 153

Wyerone, degradation of, by *Rhizobium leguminosarum*, 153

Xylanase genes, cloning and comparison of, 15

Yeasts, FCST testing of ketoconazole susceptibility of, 45

Zymomonas mobilis, cloning and expression in *E. coli* of *rec*A-like gene from, 123

Contents—Volume 23, 1991

Current Microbiology

© Springer-Verlag New York Inc. 1991

Number 1, July 1991

Arnthor Ævarsson, Olle Holst, and Jakob K. Kristjansson
Growth Behavior and Protease Production by an Icelandic *Thermus* sp. Isolate in Batch and Continuous Culture 1

Ulrike M. Kretzschmar, Rainer Hammann, and Hans J. Kutzner
Purification and Characterization of *Gardnerella vaginalis* Hemolysin 7

Terence R. Whitehead and David A. Lee
Cloning and Comparison of Xylanase Genes from Ruminal and Colonic *Bacteroides* Species 15

Frédéric Barras, Mireille Magnan, and Martin G. Marinus
Evidences Against a Role for Adenine Methylation in the Tryptophan Biosynthetic Pathway in *Escherichia coli* and for a Growth Phase-Dependent Induction of the *trp* Promoter 21

Walt W. Lilly, Gerald J. Wallweber, and Sean M. Higgins
Proteolysis and Amino Acid Recycling During Nitrogen Deprivation in *Schizophyllum commune* 27

P. Aleljung, M. Paulsson, L. Emödy, M. Andersson, A.S. Naidu, and T. Wadström
Collagen Binding by Lactobacilli 33

Gary D. Gustafson, Clive Waldron, and George E. Davis
Isolation, Characterization, and Genetic Analysis of *Aspergillus nidulans* Mutants Resistant to the Antifungal Compound LY214352 39

R. Scott Pore
Ketoconazole Susceptibility of Yeasts by the FCST Method 45

Linda Baumann and Paul Baumann
Effects of Components of the *Bacillus sphaericus* Toxin on Mosquito Larvae and Mosquito-Derived Tissue Culture-Grown Cells 51

Number 2, August 1991

Gülay Özcengiz and N. Gürdal Alaeddinoğlu
Bacilysin Production and Sporulation in *Bacillus subtilis* 61

Kevin B. Hallberg, Martin P. Kelly, and Olli H. Tuovinen
Simultaneous Degradation of the Herbicides 2,4-Dichlorophenoxyacetic Acid and 2-(2-Methyl-4-Chlorophenoxy)Propionic Acid by Mixed Bacterial Cultures 65

Dolores G. Evans, Doyle J. Evans, Jr., Tuomo K. Karjalainen, and Chao-Hung Lee
Production of Colonization Factor Antigen II of Enterotoxigenic *Escherichia coli* Is Subject to Catabolite Repression 71

Eulogio Valentin, Michelle E. Walker, and Graeme A. Reid
A Mutant Precursor Protein Is Poorly Targeted to Mitochondria and Interferes In Vivo with the Import of Other Mitochondrial Polypeptides in *Saccharomyces cerevisiae* 75

Miriam K. Lonon and Anne Morris Hooke
A Microassay for the Quantitative Measurement of Egg Yolk-Reactive Enzyme Activity Produced by *Pseudomonas cepacia* 81

Mary Jo M. Romero and Andrew T. Canada
RCI-1, a GSH-Deficient Mutant of *Escherichia coli B*: Response to Oxidants and Thiol-Reacting Compounds 85

Frank J. Cynar and A. Aristides Yayanos
Enrichment and Characterization of a Methanogenic Bacterium from the Oxic Upper Layer of the Ocean 89

Boutros J. Al-Achi, Evangelia Platsouka, and Stuart B. Levy
Competitive Colonization Between *Pseudomonas* Species in Sterile Soils 97

D. Sambasivarao and Joel H. Weiner
Differentiation of the Multiple S- and N-Oxide-Reducing Activities of *Escherichia coli* 105

Yuwen Hong, Bernard R. Glick, and J.J. Pasternak
Plant–Microbial Interaction Under Gnotobiotic Conditions: A Scanning Electron Microscope Study 111

David Donze, John A. Mayo, and Dana L. Diedrich
Relationships Among the Bdellovibrios Revealed by Partial Sequences of 16S Ribosomal RNA 115

Number 3, September 1991

T. Karunakaran and P. Gunasekaran
Cloning and Expression in *Escherichia coli* of a *rec*A-like Gene from *Zymomonas mobilis*....123

Karen J. Miller, Susan C. Zelt, and Ji-Hyun Bae
Glycine Betaine and Proline Are the Principal Compatible Solutes of *Staphylococcus aureus*....131

Miriam K. Lonon and Anne Morris Hooke
A Nonhemolytic Phospholipase C Produced by *Pseudomonas cepacia*....139

George T. Macfarlane and Sandra Macfarlane
Utilization of Pancreatic Trypsin and Chymotrypsin by Proteolytic and Nonproteolytic *Bacteroides fragilis*-Type Bacteria...143

Anton F. Ehrhardt and William F. Burke, Jr.
Construction of Direct Selection Vectors for Use in *Bacillus sphaericus*....149

Elisabeth Görge and Dietrich Werner
Degradation of Wyerone, the Phytoalexin of Faba Beans by *Rhizobium leguminosarum*....153

Wolfgang Streit, Judy Kipe-Nolt, and Dietrich Werner
Competitive Growth of *Rhizobium leguminosarum* bv. *phaseoli* Strains Under Oligotrophic Conditions....159

Biswarup Mukhopadhyay, Endang Purwantini, Everly Conway de Macario, and Lacy Daniels
Characterization of a *Methanosarcina* Strain Isolated from Goat Feces, and That Grows on H_2–CO_2 Only After Adaptation 165

R.E. Calza
Nascent Synthesis and Secretion of Cellobiase in *Neocallimastix frontalis* EB188....175

Number 4, October 1991

Athol V. Klieve, Keith Gregg, and Tom Bauchop
Isolation and Characterization of Lytic Phages from *Bacteroides ruminicola* ss *brevis*....183

Timothy J. Barrett, James H. Green, Patricia M. Griffin, Andrew T. Pavia, Stephen M. Ostroff, and I. Kaye Wachsmuth
Enzyme-Linked Immunosorbent Assays for Detecting Antibodies to Shiga-Like Toxin I, Shiga-Like Toxin II, and *Escherichia coli* O157:H7 Lipopolysaccharide in Human Serum....189

Marcia A. Miller, Dianne F. Mockler, Roger R. Hinshaw, Antoinette J. Render, and Suzanne L. Carver
Characterization of *Cardiobacterium hominis*: Antibiotic Susceptibility, Morphological Variations, Plasmid and Membrane Analysis....197

Anthony Burgess-Cassler and Syed Imam
Partial Purification and Comparative Characterization of α-Amylase Secreted by *Lactobacillus amylovorus*....207

Kyong Bin Park and Ronald G. Labbe
Isolation and Characterization of Extracellular Proteases of *Clostridium perfringens* Type A....215

Ramón Mazoy and Manuel L. Lemos
Iron-Binding Proteins and Heme Compounds as Iron Sources for *Vibrio anguillarum*....221

Philip D.A. James and Clive Edwards
Effect of Carbon Source and Oxidative Metabolism on Secondary Metabolism in *Streptomyces thermoviolaceus*....227

Félix López de Felipe and Joaquin V. Martínez-Suárez
Wide Distribution of a 36-Megadalton Plasmid Among Clinical and Environmental Spanish Isolates of *Legionella pneumophila* Serogroup 1....233

Number 5, November 1991

P.S. Bisen and S. Shanthy
Regulation of Assimilatory Nitrate Reductase in the Cyanobacterium *Anabaena doliolum*....239

Jayne E. Ellis, Peter S. Mcintyre, Mohammed Saleh, Alan G. Williams, and David Lloyd
The Influence of Ruminal Concentrations of O_2 and CO_2 on Fermentative Metabolism of the Rumen Entodiniomorphid Ciliate *Eudiplodinium maggii*....245

Daniel J. Petersen and George N. Bennett
Enzymatic Characterization of a Nonmotile, Nonsolventogenic *Clostridium acetobutylicum* ATCC 824 Mutant....253

Robert J. Penfold and John M. Pemberton
A Gene from the Photosynthetic Gene Cluster of *Rhodobacter sphaeroides* Induces *trans* Suppression of Bacteriochlorophyll and Carotenoid Levels in *R. sphaeroides* and *R. capsulatus* 259

Hilda Rodriguez, Boris Garcia, Odelsa Ancheta, and M. Sipiczki
Formation, Regeneration, and Fusion of Protoplasts in a *Cellulomonas* Strain 265

Adeline Valentine-Serano, M.E.S. Hudspeth, and R. Meganathan
Reduction of N-Oxides and Sulfoxide by the Same Terminal Reductase in *Proteus mirabilis* 271

Linda L. Nolan and Beryl Bouchard
A Rapid In Vitro System for Screening the Effect of Experimental Compounds on Nonadhering Cell Lines 277

Carlo Zambonelli, Luigi Grazia, Paolo Giudici, and Vincenzo Tini
Autolysogeny and High Isobutyl Alcohol Production in *Saccharomyces cerevisiae* 281

Cirano J. Ulhoa and John F. Peberdy
Purification and Characterization of an Extracellular Chitobiase from *Trichoderma harzianum* 285

Floyd C. Knoop, Michaela Owens, Joseph N. Marcus, and Barbara Murphy
Elevation of Calcium in Rat Enterocytes by *Escherichia coli* Heat-Stable (STa) Enterotoxin 291

Number 6, December 1991

Carlos G. Montero, Antonio Ventosa, Joaquín J. Nieto, and Francisco Ruiz-Berraquero
Physical Map of a 257 Kilobase-Pairs Region from the Genome of the Archaebacterium *Halococcus saccharolyticus* 299

Marina Dermastia, Damjana Rozman, and Radovan Komel
Morphological Changes and Induced Sporulation in HmB^R Transformants of *Cochliobolus lunatus* 303

Tuomo K. Karjalainen, Dolores G. Evans, Doyle J. Evans, Jr., David Y. Graham, and Chao-Hung Lee
Catabolite Repression of the Colonization Factor Antigen I (CFA/I) Operon of *Escherichia coli* 307

A.D. Sawant, Manal Gabriel, Stephanie Stegall, and D.G. Ahearn
Characterization of L-Leucine Transport in the Opportunistic Yeasts *Malassezia furfur* and *Malassezia pachydermatis* 315

Toshikazu Shiratori, Chihiro Inoue, Masahiko Numata, and Tomonobu Kusano
Characterization and Cloning of Plasmids from the Iron-Oxidizing Bacterium *Thiobacillus ferrooxidans* 321

R. Boopathy and L. Daniels
Isolation and Characterization of a Furfural Degrading Sulfate-Reducing Bacterium from an Anaerobic Digester 327

Carsten Milkowski and Ariel Quiñones
Cloning of Promoter-Active DNA Sequences from the Cyanobacterium *Synechocystis* sp. PCC 6803 in an *Escherichia coli* Host 333

Henny C. van der Mei, Marjorie M. Cowan, and Henk J. Busscher
Physicochemical and Structural Studies on *Acinetobacter calcoaceticus* RAG-1 and MR-481—Two Standard Strains in Hydrophobicity Tests 337

Milorad Kojic, Ljubisa Topisirovic, and Branka Vasiljevic
Efficient Transformation of *Micromonospora melanosporea* Protoplasts by *Streptomyces* Plasmid 343
